

IEEE CHANDICON 2026

Presentation Guidelines

ORAL PRESENTATION GUIDELINES

The conference schedule allocates **12 minutes** for each oral presentation. Presenters are requested to adhere strictly to the following guidelines:

1. Each paper is allotted **10 minutes** for the presentation.
2. A **2-minute** question-and-answer (Q&A) session will follow each presentation.
3. Presenters are advised to ensure that their presentation does not exceed the allocated 10-minute duration, as any additional time will reduce the period available for audience questions.
4. The recommended maximum number of presentation slides is **10**, including the title, conclusion, and acknowledgments.
5. The session chair will strictly enforce the presentation schedule to ensure the smooth conduct of the technical session.

POSTER PRESENTATION GUIDELINES

IEEE CHANDICON 2026 will provide a display board measuring **36 inches (width) × 48 inches (height)**, with a **usable display area of 39 inches (width) × 45 inches (height)**. Authors are requested to ensure that their posters fit within the designated display area.

The conference strongly recommends preparing posters in **A0 size (33.1 × 46.8 inches)** in **portrait orientation**.

Poster Preparation

IEEE CHANDICON 2026 does not prescribe a specific poster template. Authors may use any suitable template available in PowerPoint, LaTeX, or other standard formats, provided the following requirements are met:

1. The poster should be clearly legible from a viewing distance of approximately **two meters**.
2. The minimum lettering size for body text and figure labels should be **5 mm**, while section headings should be at least **10 mm** in height.
3. The **title of the paper, author names, and institutional affiliations** should be displayed prominently at the top of the poster using lettering approximately **25 mm** in height.
4. Authors are encouraged to use **high-contrast, visually balanced colour schemes** to enhance readability.
5. Posters should be printed on **matte-finish paper**; as glossy finishes may produce reflections under bright lighting conditions.

Poster Mounting

The display boards are compatible with **pushpins**, which will be provided by the conference organizers.

Poster Printing

IEEE CHANDICON 2026 **will not provide poster printing services**. Authors are responsible for printing their posters in advance or arranging printing through a local service provider prior to the conference.
